No need to hide from THIS insurance guy. Somebody once said that a New York accent was the most effective form of birth control known to man. Others might nominate as an effective contraceptive any tendency to talk about insurance. Author, risk manager and consultant Rick Vassar has penned an illuminating primer on insurance and risk management in his book, "Hide! Here Comes the Insurance Guy." The title is a take-off on the notion that, for most people, meeting

with an insurance person or discussing coverage is as much fun as a root canal or proctological exam. Vassar tries (successfully) to cushion the blow and counter the stereotype by presenting insurance and risk management principles in a straightforward way that can profit any business professional. Part of his theme is that most companies have risks that are overseen by someone whose title is not "Risk Manager." Most companies do not have risk managers but all companies have risk and need to manage it. For these risk managers without title or formal portfolio, Vassar's book is an indispensable primer and guide. Reading and heeding his advice will save businesses much money, frustration and Excedrin-consumption. Vassar divides his book into three main sections. Part I discusses business strategies to even the playing field between policyholders and insurance companies. Part II walks through the major basic forms of insurance coverage for most any business. Part III rounds out with a useful; glossary and index. Vassar's target audience is likely not the Fortune 500 or Fortune 1000 risk pro who attends the annual RIMS Conference. There is no highfalutin discussion of enterprise risk management or views from 50,000 feet above ground level.
