Photographic Lighting: Essential Skills (Photography Essential Skills)

Synopsis

Photographic Lighting: Essential Skills offers practical coverage of everything you need to know to understand the characteristics of light and the foundations of photographic lighting, including film, filters, exposure, compensation, zone system and an array of creative techniques. Students and committed amateurs will find sound technical knowledge with inspiring projects. Developing professionals in need of a refresher or a reference need look no further. The authors use terminology that is easy to understand and explain techniques in a clearly written, no nonsense manner. Photographic Lighting: Essential Skills ensures all the fundamentals of lighting are learnt and applied to help improve the use of light in photography and encourage visual expression.

Customer Reviews

Alot of topics discussed wtihin the text which is a plus, but it falls short of providing any kind of depth. Although this is supposed to fulfill the beginner to intermediate target range, most readers above the beginner level will be left disappointed. I purchased this book as it was an assigned text for school, but immediately follownig completion of the read...I purchased another Focal Press Publication as this book just scratches the surface of most topics it explores. Albeit dated, I would recommend this book for true Beginners, but for those beyond this level...I would recommend Light-Science & Magic, 3rd Ed (Hunter, Biver & Fuqua), which will give those wanting more

information on the topic of Lighting much more depth in the areas of shooting metal, glass & portraiture.

Great resource to help you on the journey in photography and lighting.
