## Customer Reviews

First things first. The most important thing to recognize about this book is that the majority of it (about 2/3) was not actually written by Jesse Livermore. It was written by Richard Smitten, a man who tries (and fails miserably) to create a sort of monologue of Livermore, complete with phony quotation marks, in which the great trader outlines his system. Having said that, Livermore's actual writings are very interesting. The first few chapters of the book is a word for word transcript of Livermore's original text, and contains much in the way of useful insight and helpful tips and information. The Livermore Market Key at the end of the book is also Livermore's creation, and it,

too, is useful in its own way. The rest of the book is cobbled together by Richard Smitten, a man who seems to have made it his life's work to piggyback on Livermore's success in order to make a name for himself. Smitten took letters and interview transcripts and pieced together a phony Livermore monologue. It is unconvincing and a complete waste of time. The writing is abysmal, and Livermore's concise points and techniques (from the first part of the book, the part Livermore actually wrote) are repeated over and over and befuddled to the point that you have to remember that it is not actually Livermore speaking. Smitten's attempt to adopt Livermore's style of conversation fails miserably, and the whole of his work is tedious to the power of ten. I couldn't even get through it-I had to skip to the Livermore Market Key at the back. The book also contains some shameless self-promotion in which Smitten attempts to peddle his biography of Livermore onto the reader and also his trading system, which he shamelessly claims will help you trade like the great legend.
